

**Dear Physician,**

Thank you for taking the time to review the information regarding **OsteoArthritis Centers of Orlando.**

At the **OsteoArthritis Centers of Orlando** our Board Certified Physicians and Licensed Physical Therapists are experts in the evaluation, diagnosis and treatment associated with Osteoarthritis, Musculoskeletal and other pain related conditions. We offer patients non-surgical treatment alternatives through the use of FDA approved medications, combined with our specialized rehabilitation treatment plans, and designed to produce measured patient outcomes.

Our practitioners and physical therapy team work closely together to develop the most specific treatment program, based on the individual needs of the patient. Our primary goal is to decrease pain and increase strength; however, our ultimate goal is to improve overall function. All of this is done in an environment, and with a team, that fosters a positive patient experience.

We would like an opportunity to develop a patient referral relationship with your practice. We strongly believe that by working together our practices can provide a continuum of care for patients to ensure every patient achieves their goals of functional improvement. Rest assured that our providers will refer your patients back to you for continued medical care as our providers focus only on specific musculoskeletal disorders. As a standard form of communication, our providers will send you detailed treatment reports summarizing treatment outcomes for each patient you refer to our facility.

Thank you again for taking the time to review our information and for considering the **Osteoarthritis Centers of Orlando** as a resource for you and your patients.
